The NEW D-Line

The Design-Line has long been synonymous with straight lines, consistent design, and modern aesthetics: It offers timeless design for the finest in your wellness area or outdoor living space. The D-Line has once again undergone a transformation.

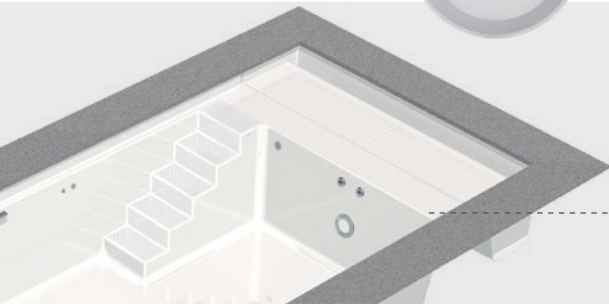

RivieraPool LIGHTS

Introducing stylish new lights that fulfill their purpose: providing bright, inviting light that is both glare-free and elegant, creating a wonderful ambiance. The new **Riviera**Lights offer unique design for your RivieraPool...

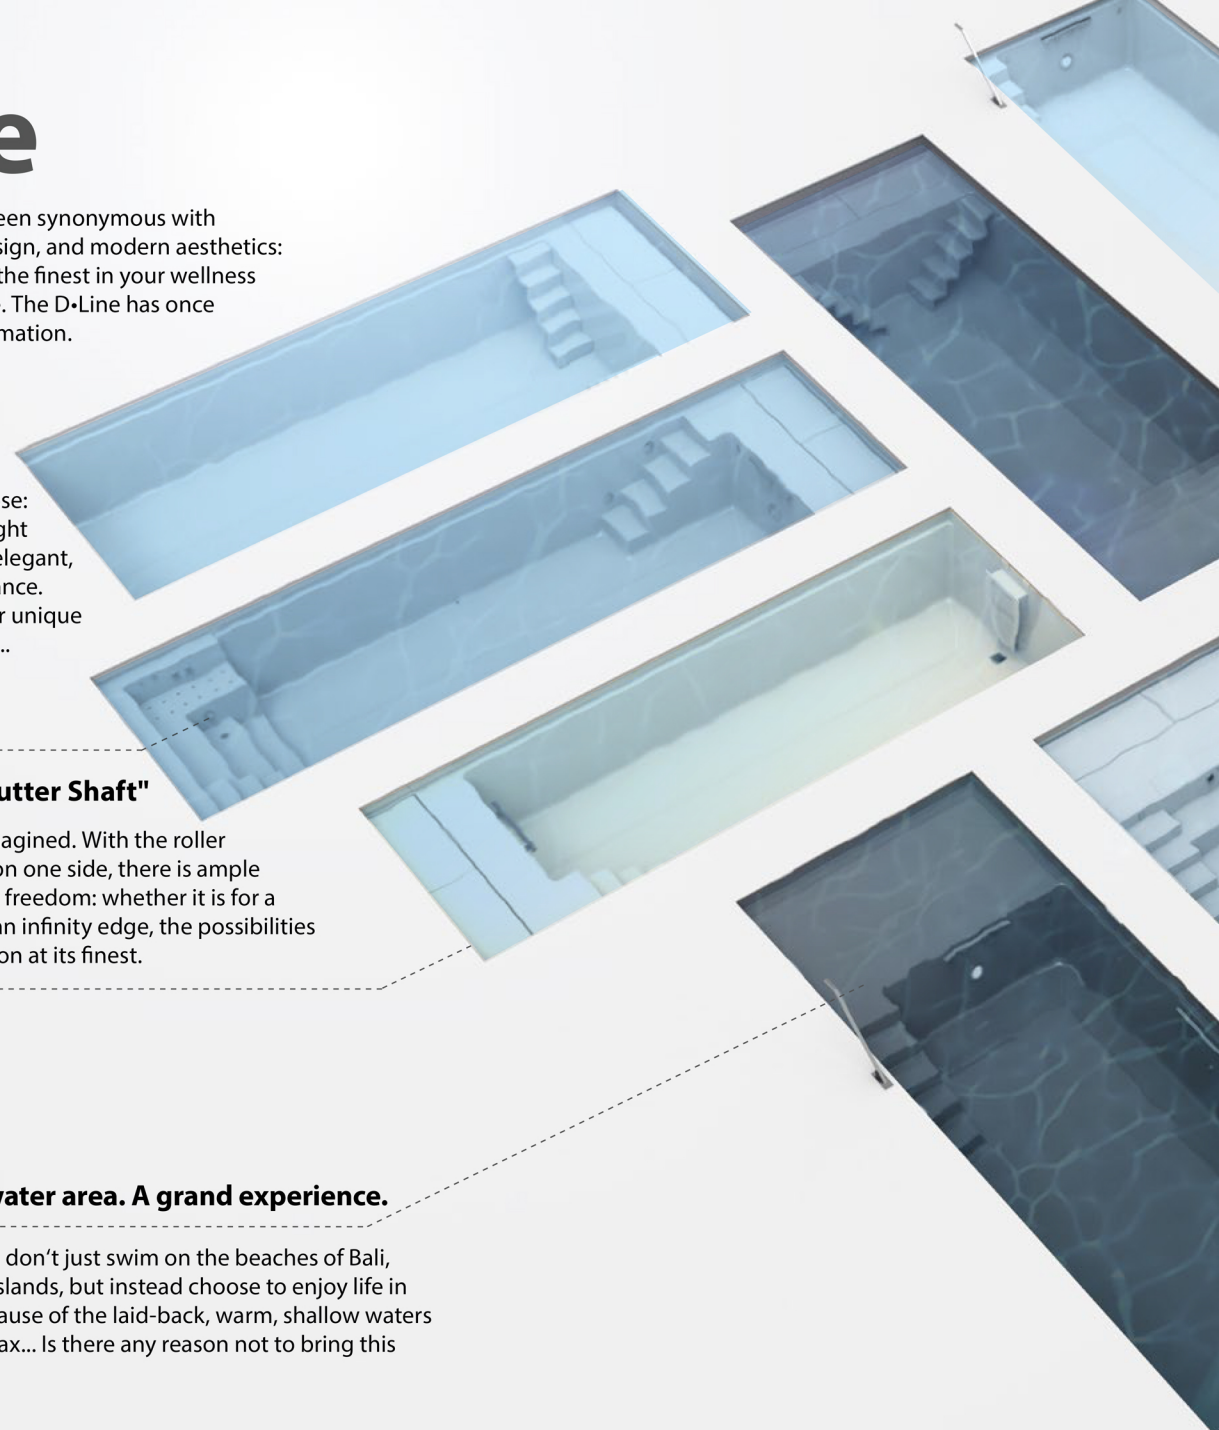

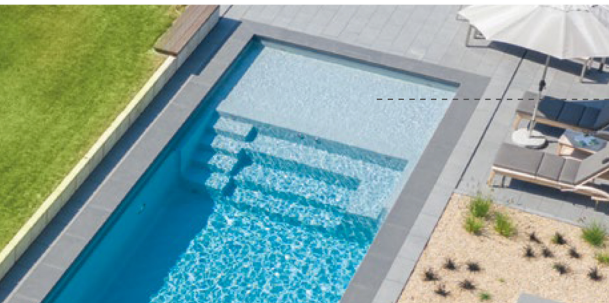

WetLounge "RS" – "Roller Shutter Shaft"

The Linear RS, a classic reimagined. With the roller shutter and stairs situated on one side, there is ample space opposite for ultimate freedom: whether it is for a counter-current system or an infinity edge, the possibilities are endless. This is innovation at its finest.

WetLounge, 2 metres more water area. A grand experience.

Ever wondered why people don't just swim on the beaches of Bali, the Seychelles, or the ABC Islands, but instead choose to enjoy life in the shallow waters? It's because of the laid-back, warm, shallow waters that simply invite you to relax... Is there any reason not to bring this experience home?

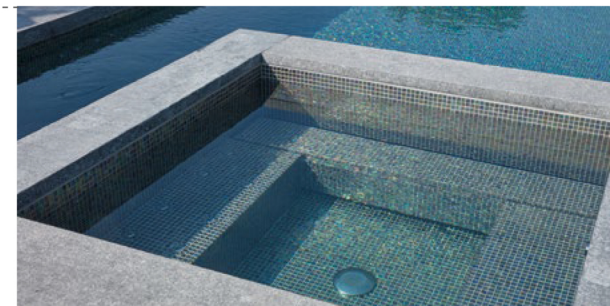

As individual as you are ...

There are numerous new opportunities to realize your unique dream pool. Nothing is as unique as you are – just like your choice for the perfect pool. The new Design Line makes it possible. There are plenty of pre-fab pools available in the market. Are you seeking more than the "standard"? Then, let's discuss your new outdoor living space. Your living area, which requires more than just a waterproof container. Eventually, the time comes – Why not now?

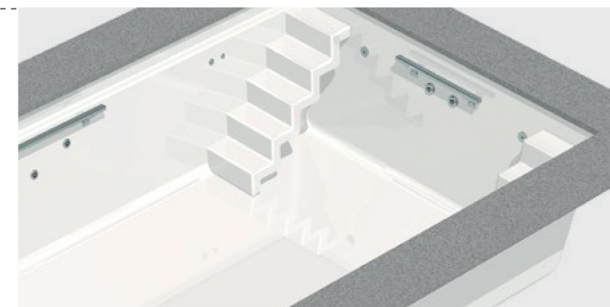

An MLine whirlpool or a C-Side minipool?

A pool that complements your pool. Slightly smaller, but warm and equipped with everything you need to contrast the refreshing swim in the pool: relaxation in warm water, hydro-massage, and wellness – all within the privacy of your garden... It's pure relaxation.

New: The "BARI" steps

More than just a southern Italian port city, "BARI" represents your individual design option. Comfortable stairs placed where you desire: whether it's at the front or on the long side. Enter your pool as you please – the possibilities are endless... it's pure sophistication!

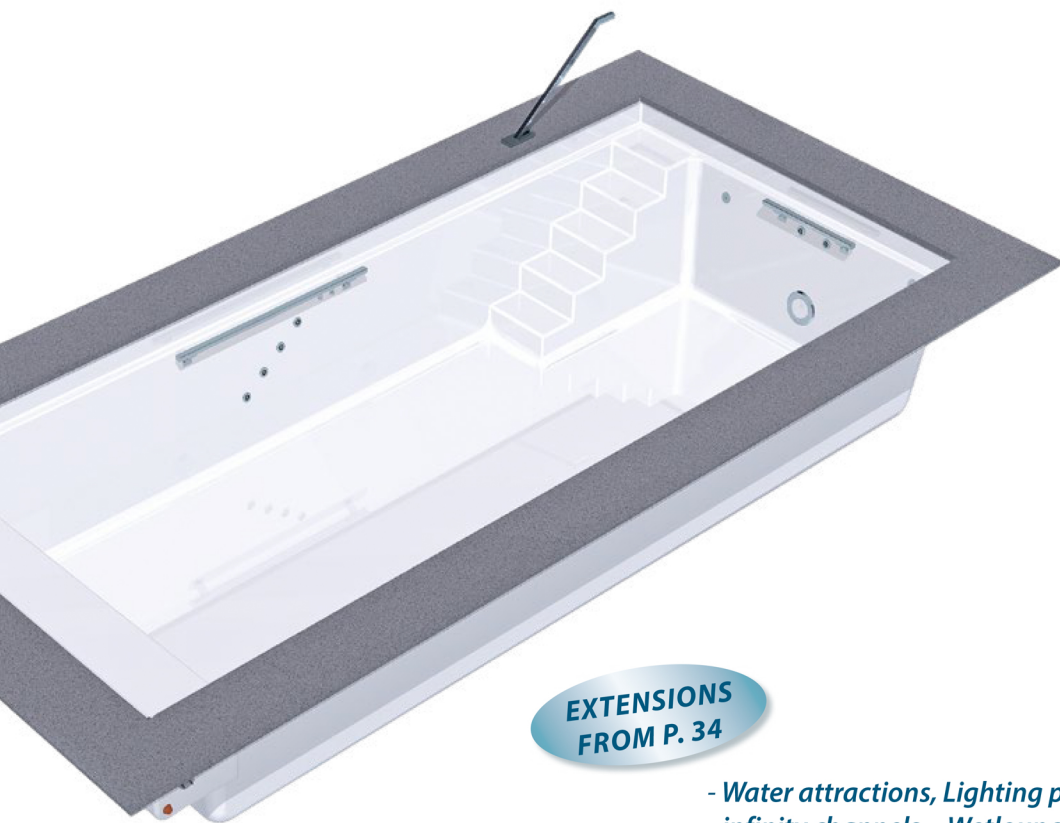

Combine ...

... the possibilities for combination are endless. Everything fits together perfectly for your perfect, private pool – a departure from standard pool offerings: an Ancona staircase paired with Wetlounge. On the opposite side, the Linear "RS" entry steps for the whole family, complete with an integrated roller shutter.

ANCONA — RivieraPool's simple entry step. A timeless design which enhances your swimming pleasure to the maximum. Allowing the whole length of the pool to be used.

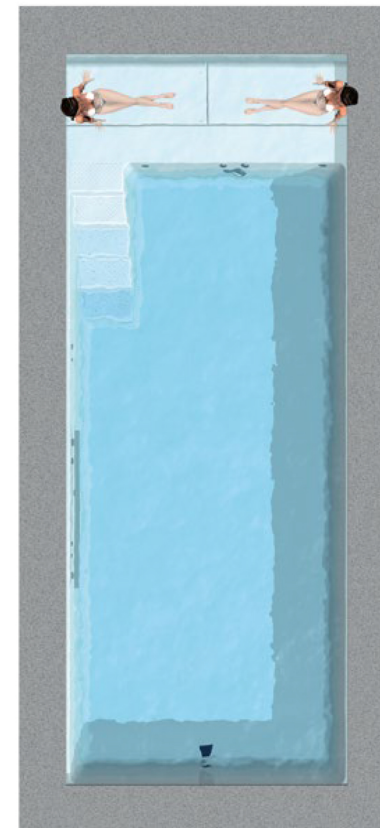

Pool step with 5 Steps on the right side with anti-slip profiled surface. Pool with 6 degree wall incline and roll cover ledge with integrated steel beam. Pool with 30 mm insulation in the floor and 20 mm insulation in the walls.

D•Line LINEAR

Roller shutter shafts:
Integra 2-13
without technik shaft

... and **RIVIERA WETLOUNGE RS**

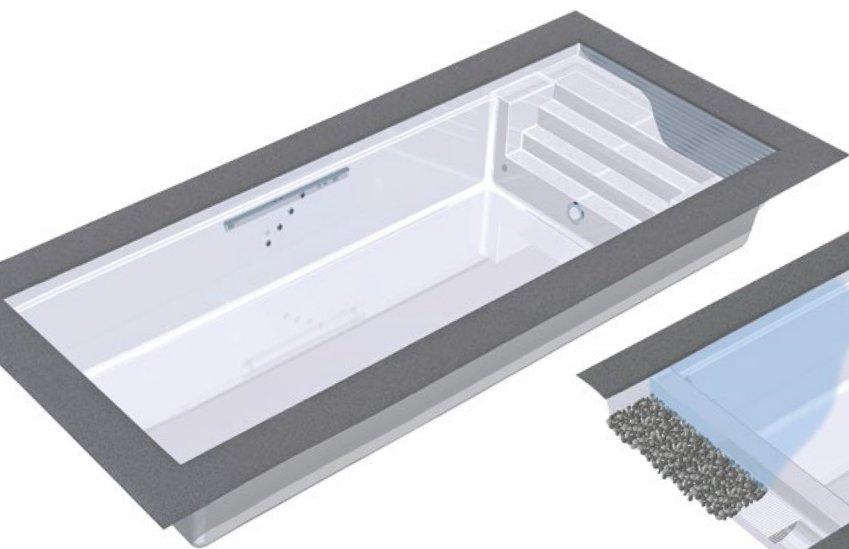

Also available with the Infinity channel
and in the self-supporting version.

Linear RS – the highlight of your garden

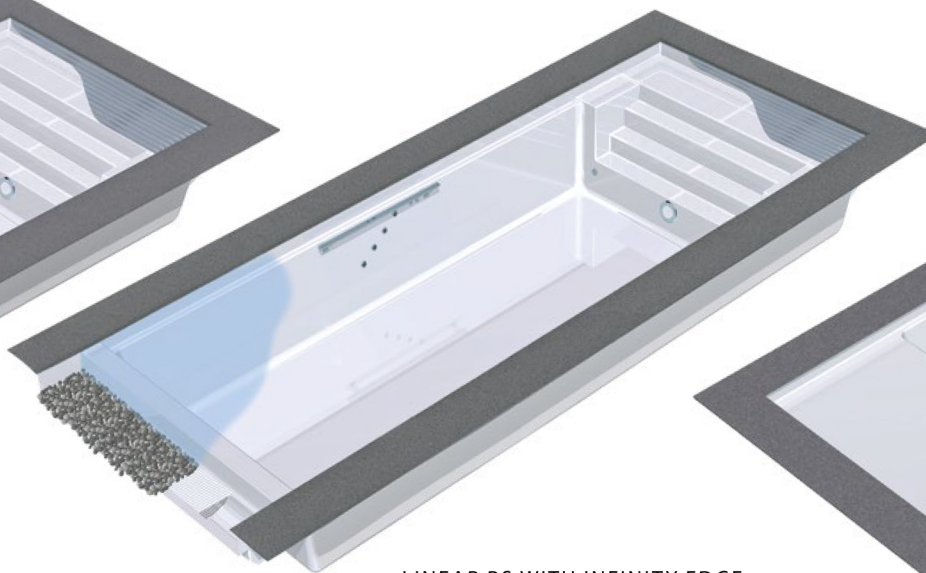

The linear step end with integrated roller shutter shaft.

A one-piece swimming pool like the Linear but with a more sophisticated feature: The Linear RS stairs have an integrated roller-shutter shaft. The cover is concealed invisibly below the steps, slides out at the touch of a button and covers the pool. For inspections, the step section can be moved to reveal the entire shaft. This arrangement also allows the use of an infinity edge that can be covered with decorative flow gravel; the water surface is smooth and calm (Fig. 2). The WetLounge is a great combination with the Linear RS stairs, providing an additional calm-water area for you to relax and your children to play (Fig. 3).

The *new* LUGANO RS – the focal point of your wellness oasis!

Just as the Linear RS the Lugano RS features an integrated roller shutter shaft. The cover is concealed invisibly below the steps, slides out at the touch of a button and covers the pool. For inspections, the step can be opened. This arrangement also allows the use of an infinity edge that can be covered with decorative flow gravel; the water surface is smooth and calm. The WetLounge is a great combination with the Lugano RS stairs, providing an additional shallow-water area for you to relax and your children to play (see example of Linear RS with Wetlounge).

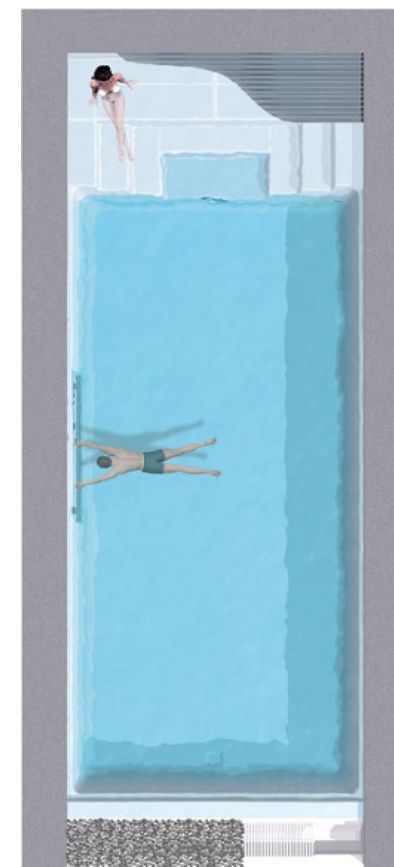

LUGANO RS WITH INFINITY OVERFLOW
AT THE FRONT END

**EXTENSIONS
FROM P. 34**

COUNTER CURRENT SYSTEMS

Back in the 80s, RivieraPool developed counter current systems that still run robustly and durably today, providing daily fitness.

The **Twinjet** is a double jet system that lets you swim against a wide powerful jet of water. A «must have» for every pool, because it makes swimming endless.

The **Trijet** units give an even more powerful triple jet, against which you swim even more physically.

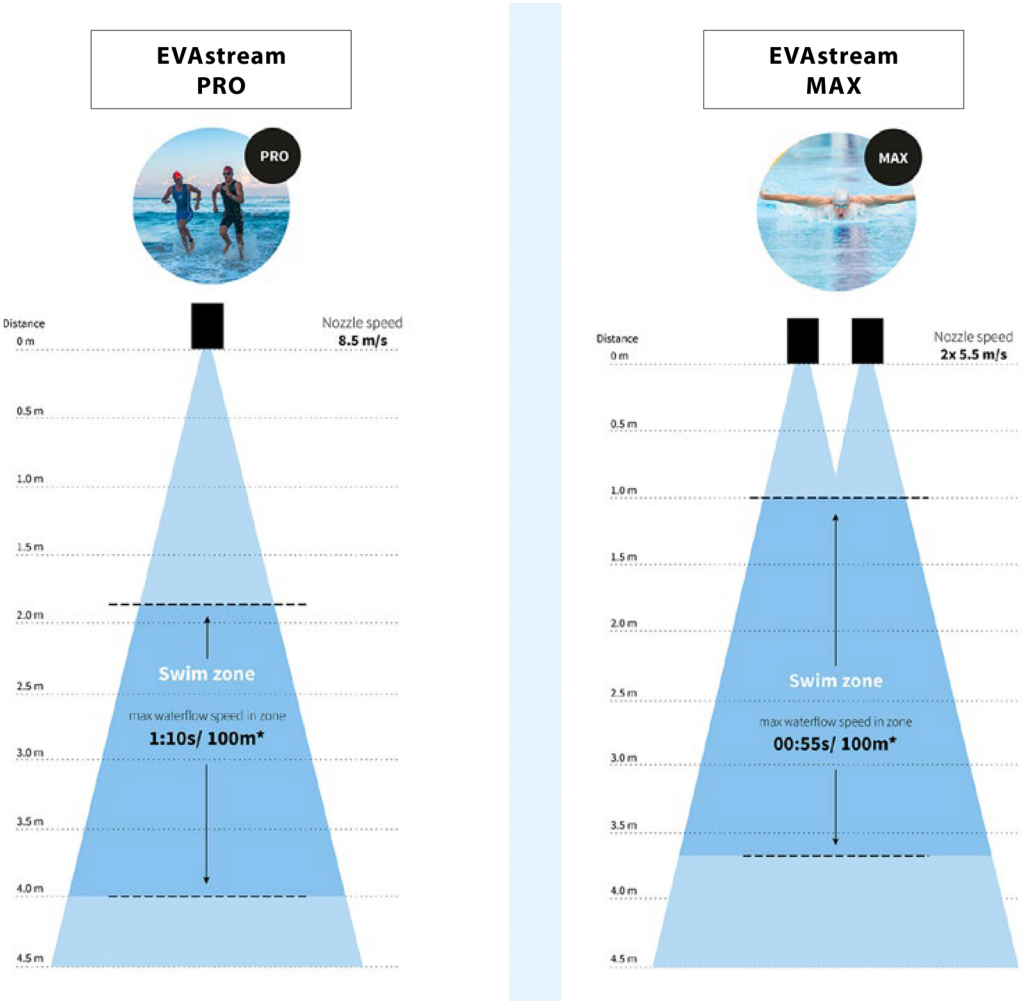

A new dimension is offered by the **Komfortjet**, an integrated counter-swimming system that creates a wide natural flow. A wide and regular current that strengthens your condition. Swim, noticeably stronger every day, against up to 300 litres or 400 litres per minute.

The highlight for real athletes comes with the established Evastream. A brand product that needs no description.

For every target group you will find the appropriate product.

RivieraPool® roller shutter cover...

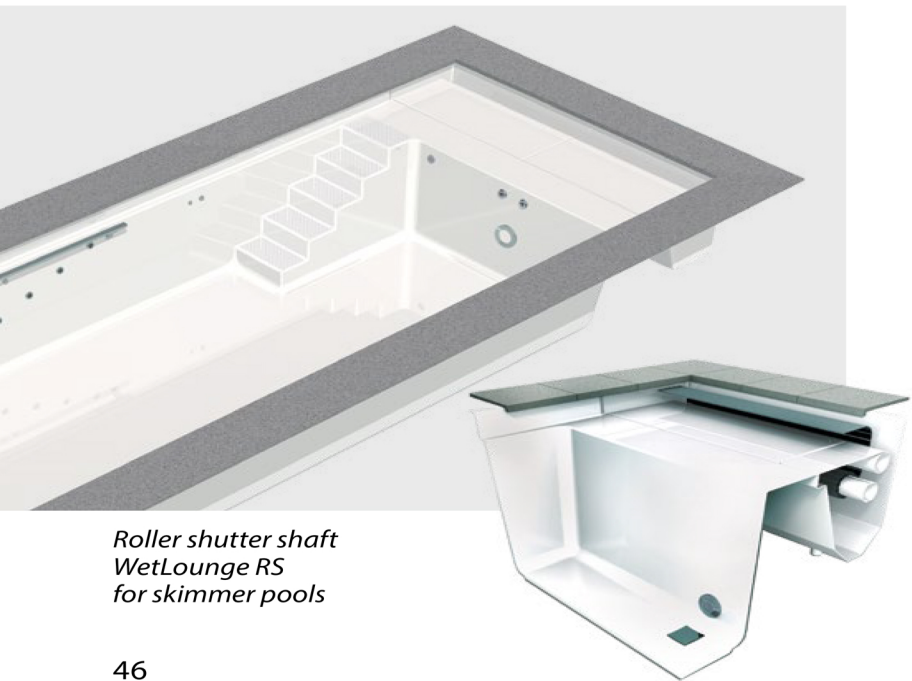

Cover: Polycarbonate solar, silver vaporised

ROLLER SHUTTER COVER BY RIVIERAPOOL

Our exclusive Thermosafe roller shutter covers are engineered for use in RivieraPool prefabricated swimming pools. Adapted and adjusted to the specific pool dimensions, shape, stairs, and layout of your pool, the Thermosafe roller shutter cover delivers safety, security, and convenience all in one brilliantly designed accessory. With a precise water level regulator and overflow fitting designed for optimal operation of the roller shutter, you can rest assured knowing your pool will be protected from the elements and your friends, family, children, and pets are kept safe.

Our Thermosafe slats are available in two styles:

With two styles to choose from, you can create a customised pool security experience that meets your unique needs, goals, and priorities. Choose between PVC, available in white, grey or solar, and the extremely durable, largely hailproof, and easy to maintain polycarbonate solar or solar silver vaporised version.

POA

Pool type: **370**, *1,9 m³

POA

Note: The tiling of the Integra 2-13 is already included in the "Mosaic surface finish" column of the price list pages.

Roller shutter niche

ROLLER SHUTTER NICHE FOR SKIMMER POOLS

The roller shutter shaft extends the pool by 50 cm.

The roller shutter will be installed behind the pool wall and below the coping stones. It extends the pool by 25 cm and protrudes 50 cm into the pool. For inspection purposes the screen can be totally removed. 2 jets are installed in the niche and there is a plain surface for installation of the skimmer. Skimmer is not automatically included and has to be ordered separately! Caution: In the 320 pool, the niche is flanged and screwed in place. In conjunction with the flanging, the insulation is 3 cm thicker in the pool base, so that the flange is flush with the pool base on the outside. External height 1.57 m!

Pool type: **270**, *0,6 m³

Winter safety cover

WINTER COVER

for Ancona, Modena, Modena 550, Linear, Linear RS, Lugano RS and WetLounge Ancona/Linear RS

Safety cover made of high-strength fabric foil in grey, integrated, stable aluminium tubes on the underside. A hand crank for convenient opening, retractable ground anchors in the pool deck and sturdy lashing straps ensure very good fastening. The ideal winter protection, protects your shutter cover from leaves and dirt, protects the pool and small animals from accidents. A worthwhile investment for the winter break.

Decor tiles made of Ezarri glass mosaic / Complete tiling

Decor tiles made of Ezarri glass mosaic

EXCLUSIVE GLASS MOSAIC SURFACES

Glass mosaic is one of the most durable, high-end surfaces available for swimming pool design. The single mosaic tiles have different tones and thus produce a unique reflection of light and colour to your pool, depending on the angle from which you're looking from and the spectral colour hitting the water surface. This result is an infinite number of different colour effects which extensively contribute to the ambience and atmosphere of your indoor or outdoor pool area.

DECOR TILES MADE OF EZARRI GLASS MOSAIC, Height: 21 cm

Series IRIDESCENT, ZEN, SPACE, COCKTAIL or METAL

Dimensions: 25 x 25 mm,
